

Symeres is the leading mid-sized transatlantic contract research organization for drug discovery and development needs. With over 600 highly educated scientists and professionals in six locations in Europe and two in the USA, we offer best-in-class solutions for drug discovery and drug development, from small- to medium-sized molecule hits. We are large enough to matter, and small enough to care. Our services span across early stage hit finding all the way to the delivery of your early clinical drug substance API. Making molecules matter. Together.

The Quality Control department in our Weert site is looking for a talented

QC Reviewer

Full-time

We are looking for candidates with an analytical background, ready to take on a role as QC Reviewer. You will be responsible for the independent verification and release of analytical data, amongst others but not limited to analytical data related to the release of raw materials, In Process Control samples (IPC's), final releases of Active Pharmaceutical Ingredients (API's), validation studies and stability studies.

The QC Reviewer has a crucial review role in various quality-influencing processes such as the qualification of reference standards, the review of analytical data for stability studies, release of raw materials, intermediates and final products and their associated validation documentation.

Qualifications

- A Bachelor degree related to analytical chemistry or at least 2 years' experience in a similar role
- Minimum 5 years practical experience within an analytical laboratory.
- Conceptual ability to correlate data.
- Good knowledge of Good Manufacturing Practices (GMP) and ALCOA++
- Broad analytical knowledge of analytical techniques, like (U)HPLC(MS), GC(MS), Titration, NMR, IC, IR, ICP-MS.
- Good knowledge of Chromatographic Data Systems, like Empower, OpenLab, Chemstation.
- Knowledge about handling of quality documents such as deviations, Laboratory Investigations and CAPAs is an advantage.
- A good work and quality attitude with an eye for detail.
- Good knowledge of quality management systems.

Job offer

An exciting position in a dynamic organization with an attractive remuneration package and opportunities for learning and development.
